# Our Expertise

Medical Transcription	Recorded Medical Scribe	Real-time / Live Medical Scribe
<p>This is the conventional transcription approach; Physicians provide us the recorded audios to transcribe, and our transcription subsequently chart the dictation precisely as it was spoken. This is the offline process in which Physician can send recording as per their availability and flexibility. Our transcriptionists attentively listen to every audio, ensuring an impressive note accuracy of 98% or higher.</p> <p><b>Delivery in 24 to 48 hours.</b></p>	<p>In the recorded scribing process, physicians provide voice recordings of their patient conversations, allowing the scribe to understand the entire interaction and create medical notes based on the discussion. Once the scribe completes the note-making process, the medical notes are submitted to the physician for approval. Upon approval, the scribes directly upload the notes to the Electronic Health Records (EHR)</p> <p><b>Delivery in 12-18 hours</b></p>	<p>In real time or live medical scribe, Physicians simply grant access to live streaming or feeds from clinical rooms and allow our scribes to connect with them in real time. The scribe watches the live conversation between the physician and patient through live streaming and accordingly prepares the notes. Once the scribe prepares the chart or medical note, it is submitted to the physician for review. Once approved, the scribe directly uploads the note in the EHRs.</p> <p><b>Instant Delivery</b></p>
Document based Scribing	Customized Services	
<p>In many healthcare settings, physicians often create handwritten notes, fill out forms, based on their discussions with patients. To transform these documents into medical notes, physicians provide clear scan copies to our scribes, who then use them to prepare the necessary notes. Once the scribes have completed the note preparation, the notes are submitted to the physician for approval. Upon approval, the scribes proceed to upload the medical charts directly into the Electronic Health Records (EHR)</p> <p><b>Delivery in 12-24 hours</b></p>	<p>Physicians juggle multiple tasks throughout the entire patient care process, encompassing pre, during, and post visits which includes call follow-up, scheduling, lab report coordination, HEDIS measures etc. We are fully equipped to fulfill the diverse requirements of physicians and function seamlessly as their assistants across various tasks. Physicians can openly communicate their specific needs and preferences, allowing us to provide tailored support in all aspects.</p> <p><b>Delivery as discussed</b></p>	<p><b>US Domestic Scribe</b></p> <p><b>Vs</b></p> <p><b>Indivirtus AB7 SCRIBE</b></p> <p>The US Domestic Scribe's salary typically ranges from \$2000 to \$4000, with overhead expenses such as hiring, training, managing, retaining, insurance, daily running expenses, and IT or infrastructure costs etc. This can result in an average total cost of \$4000 to \$8000 per scribe.</p> <p>On the other hand, services like Indivirtus AB7 can offer all ranges from \$10 to \$15 per hour with no overhead cost.</p>

## Client's Preferred Documentation

Our medical scribes engage with providers in both synchronous and asynchronous communications. Whether responding to real-time notes from doctors, audio recordings, or scanned documents, they serve as remote assistants to Physicians or healthcare providers. By incorporating provider and facility preferences, our scribes ensure uniform and high-quality charting, adhering to established quality measures. Providers have the flexibility to dictate information for verbatim recording by remote scribes, and they can also specify elements to be excluded from charting as needed.

## Scribe & Transcriptionist's Qualifications

1

### Experienced Medical and Lifescience allied professionals

- Our diverse team of experienced healthcare professionals, spanning pharma, nursing, dentistry, physiotherapy, biotechnology, and life sciences, leverages their extensive qualifications to deliver exceptional healthcare services to providers, clinics, and hospitals.

2

### HIPAA Certified

- Certified in HIPAA, they prioritize the security and privacy of patient data.

3

### Full time available and flexible

- Operating full-time with availability and flexibility of 40-48 hours per week, 160-209 hours per month

4

### Support all specialities

- Our experienced healthcare professionals collaborate across a diverse range of provider specialties.

5

### Familiar with all EHR

- Our experienced healthcare professionals provides services on all EHR

## Allocation

Specialized scribes with domain-specific knowledge tailored to the doctor's specialties are individually assigned to providers. This strategic approach not only ensures a consistent staffing model but also accelerates the learning curve for both providers and scribes. Consequently, the designated remote medical scribes become adept at understanding the provider's charting preferences and documentation style. Following the initial onboarding phase, day-to-day charting seamlessly integrates into the Electronic Health Record (EHR). In the event of any necessary adjustments, providers can easily communicate change requests directly to their dedicated scribe.

## HIPAA Compliance and Data Protection

Our scribes & transcriptionist have successfully undergone HIPAA training and passed comprehensive background checks. Employing HIPAA-compliant technology and systems, we prioritize data security and confidentiality. We further solidify our commitment by entering into Business Associate Agreements with our healthcare clients. The oversight of our HIPAA compliance is entrusted to a prominent team specializing in HIPAA compliance in the USA. We've successfully met their rigorous audit procedures and criteria, earning us the esteemed HIPAA seal of compliance and certification.
